Faculty

One of the continuing strengths of CDSA is its caring, committed faculty. All of the faculty, many of whom have advanced degrees, implicitly understand the mission of the school and are dedicated to the notion of educating the whole child. Our teachers are involved in cross-curricular and cross-grade level projects throughout the year, enhancing both the learning and leadership opportunities for students as well as the feeling of family for the whole school. 89% degreed staff.

Diversity

One of the strengths of the school community is in the diversity of the families that make up our community. CDSA families represent a wide range of cultures, beliefs, races, and ethnicities. This diversity is celebrated through the weekly observance of our multicultural calendar.

Country Day School of Arlington

Established 1959

Philosophy

At Country Day, we, as a community of learners, seek to develop confident and caring students with clear intellectual fortitude and a proclivity to question and explore change rather than avoid it.

- The Montessori philosophy begins with a deep respect for children as unique individuals.
- Montessori students develop self discipline and an internal sense of purpose and motivation.

Unique Characteristics of Montessori Education

- Classrooms typically have a 2-3 year age range.
- Montessori teaches children to think, collaborate, and to discover.
- Classroom materials—a road from the concrete to the abstract.
- Classrooms organized in several curriculum areas: practical life, sensorial, language, mathematics, geography and science.
- Children take responsibility for their own education, giving them the opportunity to make choices.
- Classrooms provide a prepared environment where children are free to respond to their natural tendency to work.

Our mission is to educate the whole child; thus we endeavor to nurture every heart and challenge every mind through the experience of meaningful inquiry.
