**Country Day is an exceptional environment for nurturing and inspiring** young learners. The pride that the staff takes in every aspect of interacting with the children is phenomenal. It is a place that i look forward to coming to daily. The majority of the staff have a 10year + tenure and authentically share - motivate- encourage each other to excellence in the classroom. They are open to sharing concerns and feel they will be embraced and considered - even if the end result it different than desired. A school where teachers take pride in their classrooms, come to work earlier than contracted to ensure their classroom has a "prepared environment" - sometimes as early as 6:30 a.m. is truly remarkable. The students have a "Love " for learning and it is such a vital foundational educational quality. Areas of improvement for our school seems to lie in marketing - as there should always be a waiting list with what is being offered and delivered daily with excellence. A place where I would personally be delighted to have my child in any classroom. Additionally, the respect for the diversity is high. Every child is not only educationally "safe" but "emotionally" safe!
